Magnus HD Packer Service Packer with Built-in Unloader Valve

Magnus HD Retrivable Packer is a high pressure, full opening, compression set tools for squeeze cementing, acidizing, fracturing and other stimulation procedures. This tool features a pressure-balance unloader that closes when the packer sets.

While pressure aids in maintaining the seal, the unloader can be easily opened under high differential pressure. The large internal by-pass reduces swabbing when running and retrieving.

Special Features:

- Large internal by-pass
- Built in pressure-balanced unloader
- ¼ turn set-straight pick up release (standard)
- Equalizing ports directly above elements
- Additional J-slot arrangements available
