### MagnusForce Hydraulic Setting Tool

MagnusForce Hydraulic Setting tools translates hydraulic pressure applied to the tubing to a force transmitted through the wireline adapter kit to the sealbore packer, plug, or cement retainer to fully set the slips and pack-off the rubber element.

MagusForce Hydraulic Setting tool and wireline adapter kit are assembled to a packer bridge plug, or cement retainer that is commonly set with a wireline deployed pressure setting tool.

Use of MagnusForce Hydraulic setting tool is particularly well suited for installation of packer, plug or retainers in highly deviated or horizontal well bores where wireline operations are impractical.

#### FEATURES:

- Applications where wireline setting tools are not recommended
- Tubing is drained after setting packer or plug
- Tandem applications possible
- Auto-fill and tubing-drain features able to be deactivated
- Push and Pull of assembly is possible
