

Magnus Swab Cup Packer

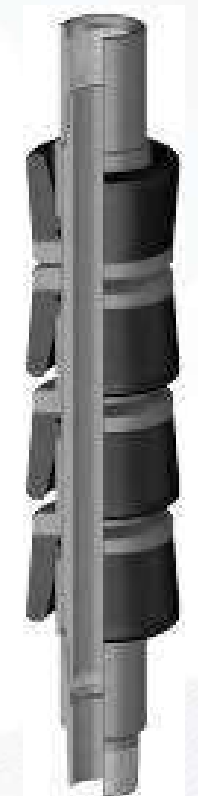

The Magnus Swab Cup Packer is an economical means of isolating casing leaks and depleted zones and is also a production or injection packer for low pressure applications. Depending on application, this packer can be run with cups opposed or in the same direction. This packer is also available with packing element back-up rings for higher pressure applications and comes in a full range of tubing and casing sizes in two-cup or four-cup models.

Magnus Swab Cup Packer Product Specifications
