FLOAT EQUIPMENTS

TECHNICAL UNIT MAGNUS DIFFERENTIAL CEMENT FLOAT SHOE/COLLAR

Authored by: Rajat

Approved by: Jogendra Singh

DESCRIPTION & FEATURES :

- ◆ Operation of the valve is controlled by the differential pressure across the valve assembly.
- ◆ Converted to conventional one-way check valve by dropping a ball and pressuring up to release the upper flapper and lock the lower sleeve.
- ◆ Until the conversion ball has been dropped, the casing can be circulated at any time without affecting the fill up operation

SIZE AVAILABILITY:

- ◆ 3-1/2" TO 30.00".
